

1CH Tuya Wifi Switch Button Single Relay Module Supports 7-32V

S4A-1CN-H

What is a WiFi relay switch?

WiFi Relays are equipped with firmware built into the board that will allow you to control one relay at a time, a bank of relays or all relays at once with manual and automatic refreshing command set. WiFi Relay Controllers allow wireless computer controlled switching from any computer connected to a network.

Specifications

Input:	5v MicroUSB/ DC 7 - 32V
Output:	10A Max,1 gang
Item weight:	35g
WIFI:	IEEE 802.11 b/g/n 2.4GHz
Frequency:	433.92Mhz(Without remote control)
Information transmission:	voice
Network:	4G
Frequency band:	2.4G
Connection:	WIFI
